

Hepatitis C Virus Program

OCTOBER 2022

MICHIGAN

Dear Providers,

The recommended treatment for Hepatitis C Virus (HCV) is Mavyret, which can be dispensed in an eight-week supply. Providers who have prescriptive authority can prescribe Mavyret to their patients with a positive HCV diagnosis. Prior authorization is not required for Medicaid.

The Centers for Disease Control and Prevention recommends patients testing anti-HCV positive/reactive should have follow-up testing with an FDA-approved nucleic acid test (NAT) for detection of HCV RNA.

Mavyret has a Nurse Ambassador Program available for additional support. Please have your patients call **1-877-MAVYRET** to enroll once the treatment has been prescribed.

Sincerely,

Meridian
