Presented by Kelsey Sala-Hamrick, PhD, LP

- Assistant Professor of Psychology, Eastern Michigan University
- Senior Research Scientist at the Center for Precision Public Health at Michigan Public Health Institute
- Advisory Council Member of the Michigan ACE Initiative

Learning Objectives

- Participants will understand the definitions of adverse childhood experiences and trauma and how they impact the patients they work with.
- Participants will learn the impact of ACEs and trauma and how to recognize signs and symptoms of ACEs and trauma in their patients.
- Participants will review elements of a trauma-informed approach and consider how to implement these approaches into their daily clinical practice.
